4. Customer Services News
5. Important Dates & Contact Numbers

Did you know?

Frederick Water has two elevated and three ground storage tanks with a total storage capacity of ten million gallons of water!

New Water Tower at Lake Frederick

Construction of a new 500,000 gallon elevated water tank near Lake Frederick is now complete! As a result of the new tank, residents of the growing Lake Frederick community will enjoy improved water pressure and fire flows. This project is one step in Frederick Water's plan to fulfil the growing water needs of Frederick County citizens well into the future!

Stonewall Park Ballfields Ready to Play!

The ballfields at Stonewall Park are ready for baseball season! Frederick Water developed the new ballpark on Stephenson Road to replace the existing ballfields at Clearbrook Park. The new ballpark will include two 300-foot fields, two 225-foot fields, one 100-foot Tee ball field, a concession stand, three buildings with 12 restroom units, ample parking spaces and ball field lighting.

Join the Frederick Water team on April 4 for Opening Day! We will be on hand to keep players, families, and volunteers hydrated with ice cold water from the Water Bar!

Route 37 Water Main Update

Frederick Water is now better prepared than ever to prevent service disruptions! Three and a half miles of 20" water main has been installed along Route 37, allowing Frederick Water to fully supply the water needs of all customers from either of our two treatment plants. This redundancy provides a more robust and secure system for the citizens of Frederick County!

Customer Service News

Planning on filling up your swimming pool? Call Customer Service to get an estimate of the cost. Please note, Frederick Water does NOT issue sewer credits for pool fills!

Did you know? Watering your lawn with a sprinkler for 1 hour 3 times a week can increase your water consumption by 8,000 gallons or more a month! This will dramatically increase your water bill. Please read the manufacturer's instructions to determine how to best direct water where you need it the most.
